WORK EXPERIENCE

Full-Stack Developer | 2025-Present

Rameses Systems, Inc.

Software Engineer | 2022-2025

BlastAsia, Inc.

Xamun AI

- Contributed to Xamun AI, an AI-augmented software development platform. Worked on both front-end and back-end development, including designing, building, and integrating APIs. Implemented complex features and resolved bugs, enhancing application performance and reliability.
- Contributed to the early development of core features for Xamun, including the ability to import Figma designs to Design Studio.
- Implemented CRUD functionality for Modules and Pages in Build Studio.
- Developed the front-end and API of Custom Application Module.
- Added support for the mobile platform in Build Studio by implementing a PlatformType feature.
- Bug fixing and UI enhancement.

Steer Marketplace

- Contributed to Steer Marketplace, a platform for managing projects and company listings. Led front-end development, designed a responsive and user-friendly interface, and integrated APIs for data retrieval and system performance monitoring.
- Developed the Registration, Accreditation, Company Listing and Project Listing Modules.
- Designed and implemented an address selection feature that dynamically loads location data based on user input improving accuracy and usability.
- Developed file upload functionality for the registration page, enabling users to upload photos, logos, and documents with proper validation. Integrated the feature with APIs and Azure Blob Storage for secure and scalable file storage.
- Implemented the CRUD functionality for Company and Project Listing.
- Bug fixing, UI enhancement and code cleanup.

Defect Detection Project

- Worked on a web application designed for defect tracking in construction sites.
- Contributed to front-end development and integration of APIs.
- Implemented the CRUD functionality for the defects.

Xamun Mobile

- Gained experience in mobile app development using Flutter and Dart.
- Contributed to the creation of Xamun Flutter Packages—a suite of Flutter code libraries designed to assist developers in building scalable applications.
- Developed ready-to-use UI components and templates, including steppers, modal dialogs, and form elements.

World Health Organization (WHO) Web Application

- Participated in the development of a web-based system for managing disease and lab reports.
- Developed user and customer management features.
- Developed the homepage and integrated APIs.

SKILLS

- C#/.NET
- HTML5 and CSS3
- Angular
- Typescript / Javascript
- SQL
- ASP.NET
- React
- Git / Github
- Azure
- MySQL / SQL Server
- Dart and Flutter
- Figma

ACADEMIC HISTORY

Biliran Province State University (BIPSU) | 2018-2022

Bachelor of Science in Computer Science
